TECHNICAL SKILLS

Programming Languages

- Java
- JavaScript
- C
- C++
- HTML/ CSS

Frameworks / Libraries

- React
- Node.js
- Express
- Postman
- Android SDK
- Room Database

Database Management

- MySQL
- MongoDB

Design Tools

- Figma

PROFILE

IT undergraduate specializing in Information Technology, passionate about **full-stack development** and UX/UI design. Seeking an internship to apply technical skills, creativity, and problem-solving abilities in real-world projects. Dedicated to learning, innovation, and contributing to impactful solutions while enhancing user experiences through intuitive designs and efficient development practices.

EDUCATION

Bachelor of Information Technology 2022- Present
Sri Lanka Institute of Information Technology (SLIIT)
SGPA: 2.48

GCE Advance Level (Technology Stream) 2018-2020
Henegama Central College

PROJECTS

Vehicle Service and Repair Management System - Team Project.
September 2024 - October 2024
Role: Full Stack developer

- Developed a Vehicle Repair and Service Center website using the **MERN stack** with key modules like employee registration, attendance tracking, salary calculation, and report generation.
- Designed and implemented efficient data management solutions to streamline HR functions and improve operational efficiency.
- Focused on creating user-friendly interfaces and robust backend systems to support seamless reporting and data handling.

Expense Tracker - Personal Project.

November 2024 - December 2024

Role: Full Stack developer

- Built an Expense Tracker application using the MERN stack, enabling users to track income and expenses efficiently.
- Designed interactive charts for monthly summaries to provide clear financial insights.
- Implemented export functionality, allowing users to download reports in CSV or PDF format for easy record-keeping.

Student Help Desk - Team Project

march 2024 - June 2024

Role: Full Stack developer

- Contributed to the development of a Student Help Desk website using Java and hosted on a Tomcat server.
- Focused on implementing the student inquiry creation feature to streamline support request submissions.
- Enhanced response efficiency by optimizing backend processes and ensuring seamless data handling.

Health Insurance Management System - Team Project

August 2023 - September 2023

Role: Full Stack developer

- Developed a Health Insurance Management System website using HTML, CSS, JavaScript, and MySQL to manage insurance policies, track claims, and view coverage details.
- Focused on building a user-friendly interface to enhance the user experience and improve accessibility.
- Ensured efficient data handling for secure, organized, and easily accessible insurance records.
