Projects

Health Insurance Management System

Team Project

August 2023 - November 2023

Developed a Health Insurance Management System website using HTML, CSS, JavaScript, and MySQL, enabling users to manage insurance policies, track claims, and view coverage details. Focused on building a user-friendly interface and ensuring efficient data handling for secure, accessible, and organized insurance records

Student Help Desk - Team Project

February 2024 - April 2024

Contributed to the development of a Student Help Desk website using HTML, CSS, and MySQL, focusing on the student inquiry creation feature to streamline support requests and enhance response efficiency.

Vehicle Service and Repair Management System - Team Project.

September 2024 - October 2024

Developed a Vehicle Repair and Service Center website using the MERN stack, focusing on key modules: employee registration, attendance tracking, salary calculation, and report generation. Designed and implemented efficient data management solutions to streamline HR functions and support operational reporting
